

Hopson No.8 Royal Park

Hopson No.8 Royal Park is a high-end project in Beijing, conveniently located on the northeast corner of 4th ring road, next to Chaoyang Park. The project was designed by renowned Boston International Design Group.

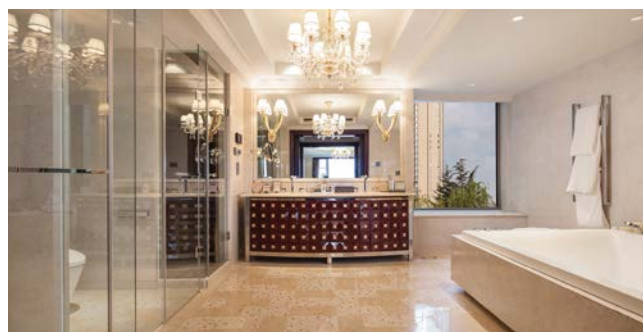

- > Location: Beijing
- > Construction Contractor: China Construction Decoration Group
- > Investor: Hopson Development Holdings Limited
- > Hardware supplier: Häfele

The main products:

- > Sliding door
- > Handle
- > Bathroom fitting
- > Dialock

The Choice of Hopson No.8 Royal Park

The interior design featured with "people oriented" which abandoned the idea of impractical luxury. The design blended in every corner, from the thousand-meter boulevard at the entrance to the pedestrian-and-vehicle road, and from the Chinese-Western kitchens to the master/servant rooms, emphasizes on very tiny details.

This project mostly adopted Häfele electronic locker Dialock, door closer and sliding door system Slido, which allows to form a perfect combination of functionality and beauty. It benefits from the application of Häfele's diversified portfolio, superior quality, as well as its professional service team, who actively cooperate with every designer individually to realize a "people oriented" project.
